

Retro fractions

Travailler autrement

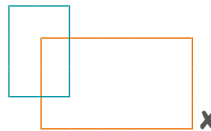

Dans les défis *Retro fractions*, une équipe de mages se répartit une zone contaminée à purifier. Ils s'occupent chacun d'une surface en forme de rectangle. Ces rectangles doivent :

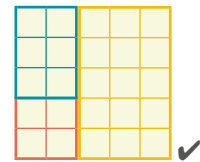

Respecter les fractions données par chaque mage.

Ne pas se chevaucher.

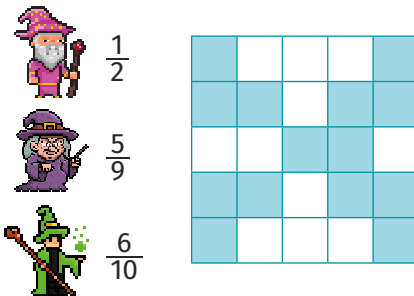

Recouvrir complètement la zone.

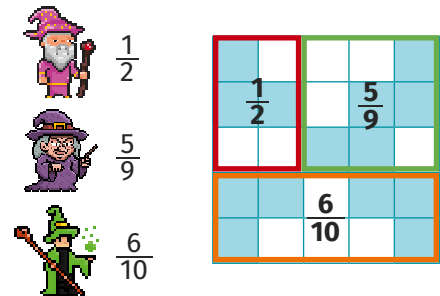

Exemple :

Voici une zone contaminée et une équipe de mages.

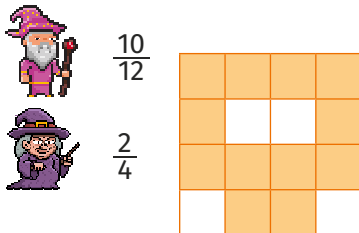

En remarquant que $\frac{1}{2} = \frac{3}{6}$, on peut la purifier avec les rectangles suivants.

Voici les premiers défis à résoudre.

Créer des défis

Inventer des défis en dessinant les zones contaminées et en définissant l'action des mages.

Dessiner les zones deux fois : une fois sur la grille « Défi » et une fois sur la grille

« Solution ». Dessiner également les zones d'actions des mages sur la grille « Solution ».
